CONVOCATION SPEECH
BY
SNR. PROF. A. P. DE ALWIS

Rajarat University of Sri Lanka

Convocation Address

Ajith de Alwis

**Professor of Chemical and Process Engineering
Dean of Faculty of Graduate Studies
University of Moratuwa
Chief Innovation Officer, National Innovation Agency**

Chancellor, Vice Chancellor, Dean of Faculty of Applied Sciences,

Dean of the Faculty of Technology, All members of the Faculties

Most importantly Dear Graduates. – Ayubowan!

First, my sincere thanks to the Rajarata University of Sri Lanka, especially to the Deans of the Faculty of Applied Sciences and the Faculty of Technology for the invitation to attend and to address you, as you graduate on this day from this historic city of Mihintale. As a Sri Lankan, it is always emotional when you visit Mihintale also passing another world heritage city Anuradhapura. For you all studying in this university with such a historical surrounding and graduating surely must be special. I sincerely hope you all understand and value the University and the journey to graduation.

You are graduating today; I am sure having endured some unique experiences. The journey in the past couple of years especially may have not been easy and full of different challenges yet you have succeeded. You must also feel grateful to the staff and all others who supported, guided, and led you through this journey as they undoubtedly would have faced many challenges themselves. Today in Sri Lanka we all are facing scenarios that we have never faced before. Now you are entering that society to work and live. You have been educated, given, and guided to wisdom and now you have to find your way and give back to society. I think it is important that I mention this responsibility factor at this stage.

Let me first remind you of some facts that apply to this place of Sri Lanka which we called Rajarata... You have studied staying in a globally well-known area. In an area of great historical significance but the most important aspects are all about the past scientific and technological prowess of our forefathers. The hydraulic

civilization did come with new inventions and turned them into innovations and supported the society to thrive – even becoming the granary of the East. Tallest stupas, protecting structures from lightning, structures that are still demonstrating sustainability, technologies that came up with surgical instruments and surveying and measurement systems ... when you move around Rajarata I am sure there is the power to wow! When we hear about issues with our health system today I have this particular memory with Mihintale. Mihintale is the location where the World's first hospital system was developed and used. You feel kind of sad when you view the past and connect to the present. Why and what happened? Over generations, we have failed to apply our knowledge back to society and lost being creative. We have succumbed to challenges quite meekly perhaps. I mention this today because unless we rise to the occasion what we can do and should, the desired change would never materialize. You need to graduate with that purpose in mind. At this juncture in Sri Lanka having that purpose is all the more important. Whoever came up with the first hospital system not only invented ways and means they innovated too. Because they applied their ideas, planted the idea on the ground, built the system and patients were treated. For them to go that far support surely must have come from the surrounding elements of the system too. Together they put their knowledge and ideas into practice and thousand-plus years later we can boast of their achievements. We must ensure bringing back the systems that allow experimentation and knowledge application. You graduates must understand the importance of execution with purpose. We too often hear the term that what we teach today is not relevant. However, debunking such comments should be done through your initiative as knowledge and wisdom imparted to you should be able to see you succeed in demonstrating such wrong stereotyping.

I would like to stress on how you should contribute. Please enjoy today! – you deserve it - and you can start being responsible from tomorrow! Today you are what you are because money has been spent on you bringing you to this level and primarily the education to this level has been free to you. You are science and technology graduates. The most important area of knowledge needed for today. You are walking into an economy that has been declared bankrupt. Now the answers to the crisis come from science and technology applications and nothing else. Applying knowledge creatively is important. I would like to quote from the late Munidasa Cumarathunge when he said The nation which does not create new things will not rise! He was not there to see our independence and he said this truly significant statement way before any university anywhere in the world started teaching on innovation. Sri Lanka's present problem has come from this simple omission. We have not been creative and had not produced anything new. Money had been invested in you and knowledge bodies have been created. Now

the knowledge bodies have to be applied to generate money for the economy. Now this latter path is named innovation. Without innovation, the economy would not grow. Without you applying yourself to the nation the country would not know that you existed!

You are also immersed in a world where science and technology are advancing at speed. One can almost sense the time before ChatGPT and the time after! Artificial Intelligence is definite to change the world. Quantum computing in its rudimentary form is already here. The digital world will transform into a quantum and a neural world. The Silicon world is likely to disappear in a while. Some also say that Artificial Intelligence is going to be the last invention of humans. What I want to stress through these statements is that you have to cultivate a culture of continuous learning and stay as learners moving on. This is important. Do not hang on to your notes and curriculum. Get ready to learn – unlearn – learn. We are in an era where change is so dynamic and unless you understand the importance of being a learner all the time, your chances of success are minimal. Dear graduates take this message to your heart if nothing else was taken. Your life ahead and success depend on cultivating this attitude.

Finally, I would like to echo the sentiments of your Chancellor. Rajarata University has unique ingredients to cultivate a mind. Some of you are likely to be researchers and you should support Rajarata University to be pioneering in research to the world like the region once was. Past has seen the exercising of such minds and results of which are still visible. This sense of pride should not just be historical. You must be moved to think that you can contribute to changing the present position of Sri Lanka. It is given in the modern history of nations that around 40 scientists in one institute changed South Korea. May this graduating batch of Rajarata in Science and Technology get imbued with such a purpose.

I wish you all strength and success!

Signing of the Register of Graduates

The Chancellor will sign the register of Graduates

**CONVOCATION SPEECH BY
EMERITUS PROFESSOR
P.A.J. PERERA**

Rajarat University of Sri Lanka

Convocation Address

Emeritus Professor P.A.J. Perera

**Former Chair Professor of Biochemistry,
Faculty of Medicine, University of Peradeniya**

The Chancellor, Vice-chancellor, Deans of the Faculties of Medicine & Social Sciences, Deans of other Faculties, Heads of Departments, Academic Staff, Distinguished Guests, Graduands, and other Invitees

I am thankful to the Vice-chancellor, the University Council, the Senate, and the academia of the Rajarata University for the honor in inviting me to deliver the convocation address to the graduands of the Faculties of Medicine & Social Science awaiting formal board certification of their degrees, following successful completion of their prescribed courses of studies.

I wish you graduands who are young and hearty, good luck in all your future endeavors and hope that you will be an asset and not a liability in taking the country forward and making this resplendent Island a wishful country to live in and enjoy life.

You belong to different disciplines and therefore to do justice I felt I should pay attention to the preliminary preparation you are likely to require when you are on the run looking for avenues for employment.

You will serve the community in different fields associated with human development and care. Some of you have already undergone some form of preliminary training in the fields of study, some are awaiting to undergo training like medical internship, some are being motivated to undertake in depth specialized training like those aspiring to be academics, while a few haven't had the opportunity to be involved with such programs. It is beneficial for those of you in the latter group to be exposed to some form of preliminary favorable training, less they face problems at the time of employment.

Once you begin employment, you need to prepare yourself to serve the community, while plans are executed side by side for your own upliftment. I have collected some "anecdotal thoughts" that could be easily understood, which in my view, could help you to develop "life and workplace ethics and skills" that could make Sri Lanka a wishful country to work and live in happily.

- Take care of nutrition in the maintenance of healthy life.
- Do participate in aerobic activities in the promotion of an active life.
- Be punctual at work and be an example to others.
- Instill discipline at work by being a follower of rules and regulations rather than through their enforcement by others.
- Improve efficiency by mutual understanding and cooperation between personnel rather than through unilateral action of one individual.
- Give a helping hand to those seeking advice and help, especially the old and the weak.
- Remember a smile will not cost you but will help you to establish a cordial relationship with someone who might matter someday.
- Don't discriminate others based on race, religion, or color as it will lead to misery.
- Resolve crisis situations by being humble and ready to listen to those confronted with problems.
- Stay cool when arguments reach a status when common sense disappears.
- Establish norms through consensus and improve efficiency at work accordingly.
- Be caring and humane to your parents and family members and remember that they look up to you as a learned person for guidance and advice.
- Do always respect your teachers.
- Remember the degree that you get today is only the beginning of a journey and more needs to be done to reach the pinnacle of your expectation.
- It is often stated that "failures are the pillars of success". Do have the courage to overcome all such obstacles until you reach your goal.
- A working knowledge in English, Mathematics and Computer Science will be "a feather in your cap" in the ascent to reach the goal.

Currently, the country is in a financial crisis and one way out as proposed by the government is to tax the high-income earners. When you graduate and with time get established as a specialist you are likely to be classified among the high-income earners. Be ready to pay your income tax dues. It is unavoidable, and as a citizen you should be obliged to pay your dues for providing you with free education, health services and other social benefits you have been enjoying up to date. I have done my part and it is up to you to continue that practice, less the country ends up as "a failed state" and financially crash! The government too has an obligation to inquire into the grievances of those affected by this move and try to resolve the crisis in a manner that is most helpful to its citizens and the country at large.

Increasing numbers of doctors and other professionals are beginning to leave the country for their upliftment, enhancement of their profession, benefit of their families etc. Some will return home to further improve their quality of life here, while others may leave home permanently causing great losses to our motherland. Such incidents are inevitable when the country is broke but could be remedied if

proper planning is done. When sudden decisions are made without proper planning such incidents do occur.

In the immediate past, the country had to face food scarcity, especially rice, partly because of switching to compost fertilizer from chemical fertilizer in agricultural farming. It may have been a wishful proposal, but this hypothesis should have been tested by agricultural specialists before embarking on such a venture of massive magnitude. There is a proverbial saying in Sinhalese that “one shouldn’t allow an ass to do the work of a dog”. It sounds even more forceful if one were to put it in Sinhalese, which states “Ballage wade Booruwata karanda denna epa”.

I wish and pray that our young graduates passing out will in some way have the will and motivation to rid this country of evils that have deprived the masses to live in peace and comfort without confrontation.

Let us together make Sri Lanka a developed country where everyone will look forward to settling down, work and enjoy life. Remember that when you are away in a foreign country you are a foreigner, and in a ‘colloquial sense’ you may have to bow down to whims and fancies of the locals in those countries, who have a different culture and beliefs. In short, what you gain financially you lose socially. Before you make drastic changes to your lifestyle do give serious thought to the likely obstacles you may have to face. Be aware of the often-used phrase that “beggars can’t be choosy! The fact is survival does matter when other options are not available. Now that you are educated, do critically analyze the situation before you make a serious move.

With progress in overall education and standards of living, discriminatory actions appear to be leaving the shores of the developed countries. Few Sterling examples are Barak Obama reaching the pinnacle of leadership in the USA and becoming its President and recently Rishi Sunak becoming the Prime Minister of the UK.

I enjoyed speaking to you all, partly because I was a volunteer in the group of academics that moved out of comfortable living in our own homes to come to Rajarata University to establish the new Faculty of Medicine and Allied Sciences in Saliyapura. I see that it has grown from the fetal state to what I would now call the adult stage. From the recent report findings that evaluated performance among the Medical Faculties, I am glad to say that you have done remarkably well. Congratulations!

But unfortunately, there appears to be an exodus of medical teachers from the faculty, and this may cause disruption in the teaching programs. I hope the University Council, the Senate and all those concerned with medical education

along with the Government will be able to resolve this crisis before it gets out of hand.

Thanks for your patience in listening to me.

Wish you all a pleasant evening!

(Honoris Causa)**

Conferment of an Honorary Degree of Doctor of Sciences

Emeritus Professor S.G.J. Senanayake

Presented by: Prof. G.V.T.V. Weerasooriya, Dean, Faculty of Agriculture

Most Venerable Chancellor,

It is a great honor to have with us today Emeritus Professor Senanayakage Gamini Jayalath Nonis Senanayake to award him the Doctor of Sciences D.Sc. (Honoris Causa). I would like to express the deepest gratitude to Prof. Senanayake on his acceptance of the Honorary Degree at Rajarata University of Sri Lanka. The Doctor of Sciences D.Sc. (Honoris Causa) of Rajarata University is awarded to those who have contributed profoundly to the progress of human society and academic research.

Professor Senanayake graduated in 1979 from University of Peradeniya, Sri Lanka. In 1983 he was awarded Danish Government "DANIDA" scholarship for Postgraduate studies in Denmark. He completed the Ph.D. in Plant Science in 1988 at the Royal Veterinary and Agricultural University in Copenhagen, Denmark.

Just after the graduation from University of Peradeniya, Prof. Senanayake joined University of Ruhuna as Assistant Lecturer and he climbed up the career ladder stepping in all the academic posts, Lecturer, Senior Lecturer Grade 2 and 1, Associate Professor, Professor and Senior Professor. In addition, he has held many academic-administrative posts such as Senior Student Counselor, Director of the Career Guidance Unit, Head of the Department, Deputy Vice Chancellor and Vice Chancellor of the University of Ruhuna.

At present Professor Senanayake serves as the Chairman of the Expert Committee appointed by the Secretary to the His Excellency the President of Sri Lanka to develop a policy framework to modernize the agriculture sector in Sri Lanka. After retiring from the 42 years long university service, he served as the Chairman of the Sri Lanka Council for Agricultural Research Policy, Ministry of Agriculture. In addition, he served in many national level positions such as Chief Consultant of the City University Project, Ministry of Skills Development, Vocational Education, Research and Education, Visiting Consultant, Sri Jayawardanapura University of Sri Lanka and Member of the Directors of the Rubber Research Board of Sri Lanka. Council Member of the University Vavuniya and Bikshu University of Sri Lanka and Member of the Board of Management, Postgraduate Institute of Agriculture are few positions he is holding at present.

Further he has served as an advisor and the consultant in many national development programmes in Sri Lanka. Ministry of Agriculture, National Physical Planning Department, Ministry of Rural Development, Southern Province Development Authority, Ministry of Planning & Implementation, Ministry of

Irrigation, Integrated Rural Development Programme (IRDP), Ministry of Forestry & Environment and Southern Development Authority are some of the institutions in Sri Lanka to receive his service.

His services have not limited only to Sri Lanka. He has served as an advisor for International Atomic Energy Authority and as a Visiting Research Fellow at the National Grassland Research Institute, Japan, University of Reading, UK and University of Pertanian Malaysia.

As a result of his excellent academic and research career, he has won many prestigious awards locally as well as overseas. He won the President's of Sri Lanka Research Award for contributing to the reputation of the country in a wider context of the global advancement of science and human knowledge in 2001. Further he has won awards from Royal Society of United Kingdom, Commonwealth and International Atomic Energy Agency, Austria. He is the first Lankan to win Science and Technology Award of Japan.

Although he served in many administrative positions including six years in Deputy Vice Chancellor position and another six years in Vice Chancellor position, he continued his research work on Plant Breeding and Genetics. He has published over 100 peer reviewed scholarly articles in reputed journals and presented his work at numerous academic forums locally as well as overseas. His early work led to the crop biodiversity restoration in Sri Lanka. He has done significant amount of work to maintain "environmental health" using indigenous knowledge. Later he focused his research mainly on finding solutions to excessive use of Chemical Nitrogen fertilizer through isolation of locally available *Plant Growth Promoting Bacteria* and incorporating nitrogen fixing genes isolated from *Bradyrhizobium* into rice.

Most Venerable Chancellor,

Further, I would like to mention that I am one of his students at the undergraduate level and therefore I personally consider it a privilege for me to introduce this well recognized and experienced academic administrator and researcher, Emeritus Professor Gamini Senanayake to award him the Doctor of Sciences D.Sc. (Honoris Causa).

**Award
of
Academic Distinctions
(Medals and Prizes)**

Faculty of Agriculture

01 Prof. Aruni Weerasinghe Gold Medal

Ms.Thilakamuni Shehani Soysa Gunasekera

- The Overall Highest FGPA

02 Mr. Vincent Subasinghe Gold Medal

Ms.Thilakamuni Shehani Soysa Gunasekera

- The Highest GPA in Core Courses

03 Dr. D.M. Jinadasa Gold Medal

Mr.Muhandiramge Dilan Danushka Rodrigo

- The Most Outstanding Performance in the Department of Agricultural Engineering & Soil Science

04 Prof. K.D.N. Weerasinghe Gold Medal

Ms. Sandali Randika Manawaduge

- The Most Outstanding Performance in the Department of Agricultural Engineering Specialization Module

05 Prof. K.A. Nandasena Gold Medal

Mr. Muhandiramge Dilan Danushka Rodrigo

- The Most Outstanding Performance in the Environmental Soil Management Specilization Module

06 Prof. S.L. Ranamukhaarachchi Gold Medal

Ms. Dewayalage Sudini Bhagya Jayarathna

- The Most Outstanding Performance in the Department of Agricultural Systems

07 Prof. G.A.S. Ginigaddara Gold Medal

Ms. Dewayalage Sudini Bhagya Jayarathna

- The Most Outstanding Performance in Agricultural Systems & Management Specialization Module

08 Prof. Vijay Jayasena Gold Medal

Ms. Munasingha Arachchilage Yuresha Malshani Amarasooriya

- The Most Outstanding Performance in the Department of Animal & Food Sciences

09 Prof. A.M.J.B. Adikari Gold Medal

Ms. Munasingha Arachchilage Yuresha Malshani Amarasooriya

- The Most Outstanding Performance in Animal Production & Technology Specialization Module

10 Prof. P.H.P. Prasanna Gold Medal

Mr. Thenne Kumbure Gedara Pathum Lakmal Weerakoon

- The Most Outstanding Performance in Food & Postharvest Technology Specialization Module

11 Dr. Sena Yaddehige Gold Medal

Ms. Thilakamuni Shehani Soysa Gunasekera

- The Most Outstanding Performance in the Department of Plant Sciences

12 Prof. Abhaya Balasuriya Gold Medal

Ms. Racshani Rajmohan

- The Most Outstanding Performance in Agricultural Biology Specialization Module

13 Prof. U.R. Sangakkara Memorial Gold Medal

Ms. Thilakamuni Shehani Soysa Gunasekera

- The Most Outstanding Performance in Crop Science Specialization Module

Faculty of Management Studies

01 BOC Gold Medal and Gold Coin

Ms. Amra Mehnaz Sheriffdeen

- Overall Best Performance in the Faculty of Management Studies

02 Prof. Geoffrey C. Loyed Gold Medal

Ms. Kudakariya Karanage Dilini Isurika Peiris

- Best Academic Performance in the Faculty of Management Studies

03 Mr. E.N.A. Wirasinghe Gold Medal

Ms. Don Sekara Badalge Kasuni Dilshana Thilakarathne

- Best Performance in Bachelor of Science (Accountancy & Finance) Special Degree

04 Securities and Exchange Commission of Sri Lanka Gold Medal

Ms. Badulpe Pathirana Anuradha Wathsala Perera

- Best Student in Investment and Portfolio Management

05 MBA Alumni Gold Medal

Ms. Yaddahi Gedara Thakshila Sewwandi Weeraratna

- Best Student in Financial Accounting Subjects in B.Sc. (Accounting & Finance) Special Degree

06 Department Gold Medal

Ms. Badulpe Pathirana Anuradha Wathsala Perera

- Best Performance in Auditing and Taxation Courses in B.Sc. (Accountancy & Finance) Special Degree

07 Mrs. B.W. Wirasinghe Gold Medal

Ms. Kudakariya Karanage Dilini Isurika Peiris

- Best Performance in Bachelor of Science (Business Management) Special Degree

- Cash Award**
- 15 **Securities and Exchange Commission of Sri Lanka – Cash Award**
Ms. Samarakoon Mudiyanseelage Sithara Nethmi Jayathilaka
- Best Student of Financial Management

**CONVOCATION SPEECH
BY
PROF. R.U. HALWATURA**

Rajarata University of Sri Lanka

Convocation Address

Professor R.U. Halwatura

Professor in Department of Civil Engineering

University of Moratuwa

Moratuwa

A convocation is always an amazing and unforgettable experience in any person's life. Depending on where you sit during this ceremony, you will get a completely different experience. I have covered almost all the well set positions in a convocation now. I have sat there like you as a student, I have sat where the staff sits and I have sat where the invitees sit. I am yet to experience the pride and joy of sitting in the audience as a parent. But, like a parent, I feel that same pride and joy when I watch my students come up on stage. Last year, at the convocation at University of Moratuwa, I had 9 post-graduate students in one convocation, 5 of whom were PhD graduates. And each time one of those 9 students came up on stage, I had tears in my eyes, I remembered every step of our journey and the tough times we faced together. I knew how much their achievements meant to them. Their achievements were my achievements. So I know how proud you are feeling today as parents even though my own kids are still too small to enter a university.

Today marks a milestone in your life. Whether you are ready or not, you will be now sent to the real world, a fiercely competitive society full of turbulence and challenges. From today onwards you will be known as graduates. Take a moment and think, are you ready to face this society? Do you have the confidence to move forward with your life? Whatever said and done, we need to accept that our education system and the real world exist in different spheres. We have super schools, where the name of the school is given precedence over the talents of the individual. However, this special recognition is now being challenged. We also have super universities and branded degree programs. When the rest of the world values creativity and contribution to society, we in Sri Lanka put greater value on paper qualifications. Regardless of their individual skills and talents, we judge people based on where they studied and what they studied. This was our past, this may even be our present but I assure you this will not be our future. For us to have a country, a prosperous country, this culture must change, otherwise there is no survival.

I think we all agree that an education system should be geared towards learning not earning. However, once you get the qualification, if you can't use it for your personal and professional development, then that qualification needs to be seriously questioned. But this is the sad state of the entire education system of the country today. For most of your life you have not had to worry about survival in society. When you do your O/Ls, there is no need to worry, you have another 2 years to learn in the A/L class. When you do your A/Ls again no need to worry, you have another few years to learn at university. So, you have been continuously passing the ball to the next level. But now you have reached the end of that chapter. Where are you going to pass it to next? Until today your teachers have guided you, your parents have mentored you. They have led you and brought you to this point in your life. But from now on you should carve your own path. You yourself should be your own teacher, your own mentor, your own motivator; in short you should be your everything. Even after today, if you still think that you need to be guided, that you need to be looked after and if you still lack the confidence to face the challenging new world ahead, then it does not mean that you have failed. It means that our education system has failed you.

We give you the knowledge but not the training. We don't train you on how to be adults. Even in the university, you are not treated as adults. Finally, from universities we get a bunch of graduates with classes but without the skillset or the competence to survive in the real world. This is the reason why we have an overwhelming number of job seekers but very few job creators. All of us come into this world full of creativity, full of dreams and lateral thinking. Unfortunately, the education system, the teachers and parents, gradually destroy these qualities out of our students. And in turn we fault them and blame them for being unfit to meet the needs of the real world.

As teachers and parents, we need to seriously think about this issue and advocate for a change in the system. The graduates are not the ones at fault, but regardless of this they must be ready to face this challenge. Now it's not the time to point fingers and assign blame, you need to solve these problems by yourself and create your own path in this world. For more than 16-17 years you have lived the life that others wanted you to live, you studied what they wanted you to study, now it is high time to think about what you want. Think about your role in this world and how you can contribute to it. To do that first you must understand who you are, your skills and your talents. What you do with your life should align with your inborn skills and talents. The first step in achieving this is to understand who you are. Unless you know exactly who you are today, you will not be able to foresee who you want to be in 5 years, 10 years and so on.

So, I urge you. Stop all your work. Stop reading whatever you are reading. Start reading the book about yourself. Understand what you know, what you can do,

what your talents are. Don't stop there, learn what you don't know, expand your knowledge, sharpen your skills and broaden your thinking. Up until today, you dressed like someone else, you cut your hair like someone else, simply speaking you were just trying to be like someone else. Someone just like the millions of people out there. Do not try to be one of the many. Be your own self. Be uniquely you. The moment you start identifying who you are, you will build your own character, your own brand. You will stop working for others, doing for others and you will start to work for yourself. You will start valuing who you are and at the same time you will start to value others, because you now know that different people have different strengths. Only then you will gradually start to enter real society. Only then can you really start enjoying your life, confident in the knowledge that you are fulfilling your social responsibility.

So, from today onwards, if you are unhappy, know that it is not because of a fault in the system, it is because of your own fault. Will you choose to be happy or unhappy? The decision, once again, is on your shoulders.

Thank you.
